\$3,000.00

**GOODYEAR
PRIZE CONTEST**

Anyone from a family
where a car is owned may
enter, except tire dealers, em-
ployees of rubber companies
and the families of both.

See the six Goodyear Tires
of various sizes, types and
ply-thicknesses on display
here. Then estimate the
number of cords in each of
these tires, find a total, and
divide by six to obtain the
average. You may examine,
too, a section of tire cord
fabric also on display. Sub-
mit your estimate on the
standard entry blank which
is free. No other require-
ment. You don't have to buy
anything.

Closing date: June 5th,
1932. Address: "The Good-
year Supertwist Cord Con-
test," New Toronto, Toronto
14, Ontario.

HOW MANY SUPERTWIST CORDS

IN THE AVERAGE GOODYEAR TIRE

Sommerfield & Mayer,
STONY PLAIN.

Come in and see Supertwist Cords demonstrated
and get a helpful booklet of contest directions.

Doberofsky-Schreier.

A wedding ceremony took
place at St. Matthew Lutheran
Chapel, Stony Plain, on Sun-
day last, April 24, when Miss
Katherine Schreier of Stony
Plain became the bride of Mr.
Gustav Doberofsky of Heath-
erdown district.

The ceremony was perform-
ed by Rev. Emil Eberhardt,
the pastor; and the edifice
was thronged with the friends
of the contracting parties.

On the return from their
honeymoon, the happy couple
will take up their residence
on the bridegroom's farm at
Heatherdown.

Youth Injured.

An accident which might
have resulted in much more
serious consequences occurred
about 6 p.m. Saturday last, at
the east end of town.

While two young men, Bert
Becker and Walt Peters, were
examining a blasting powder
cap, at the home of young
Peters, the cap inadvertently
went off, with the result that
the cap became embedded in
the upper part of Bert's right
leg.

Dr. Walton has hastily sum-
moned, and relieved the suf-
ferings of the injured youth,
after which the latter was
taken home, where he is now
resting easily, with the pros-
pect of being around again in
the course of a few weeks.

The Walther League Play.

The big attraction at Moose
Hall on Friday Evg. was the
presentation of the Walther
League's annual play, this sea-
son's effort being entitled
"Civil Service," a comedy-
drama concerning the doings
in a country postoffice.

Despite the bad roads and
inclement weather, friends of
the players turned out in suf-
ficient numbers to fill the hall
when the curtain went up,
and extra seating accommoda-
tion had to be provided.

The play ran along for its
three acts in a very smooth
manner. The audience was
evidently in the mood to be
pleased, and showed its ap-
preciation of the efforts of
the amateurs by applauding
in a hearty manner.

John Unterschutz as Gold-
die Wex, the Country Boy,
did the comedy part to per-
fection. Some of his sallies
were very funny. John's per-
formance appeared so natural,
one wondered if he were
really acting.

Bill Miller, the veteran act-
or, hidden behind an ambush
of high priest whiskers and
wearing britches reminiscent
of the homestead days, took
the mystery part of old R.F.D. and
played the part in excellent fashion.

The hero character, Steve Aud-
ain, was taken by Otto Wudel Jr.
Mr. Ot is new to the game, and
had been given a rather difficult role.
No doubt he'll improve as the years
go by. The characterisations given
by each of the five young ladies en-
gaged in the play were so good it
would hardly be fair to particu-
larise on the performance of any one
individual; suffice to say each will
be given a hearty reception on her
next appearance.

Balanced Budgets

The news is flashed around the world that Great Britain which, only a few months ago, was in dire financial straits, has balanced its budget. It was accomplished by the adoption of rigid economies on the one hand and the imposition of heavier taxation on the other hand.

The United States with a current deficit of over two billions of dollars, is engaged in the task of trying to find a way to balance its budget. Here too, the imposition of new and heavier taxation is being considered as the only way out, with economies in administration receiving less attention than in Great Britain.

The Government of Canada, and the Governments of the various Provinces of Canada, are all engaged in the same work—trying to balance their budgets and the same remedies being applied, reductions in services to the people coupled with heavier taxation levies.

All municipal bodies and boards of school trustees are likewise employed, but, in the case of these minor governing bodies, more effort is being applied in the reduction of expenditures, and less recourse is being had to the imposition of new taxes; in fact, most municipal councils and schoolboards are striving to reduce taxation.

But what of the individual citizen? He is in the same predicament as governments. He is confronted with greatly decreased income, or none at all, as a result of unemployment or failure of his business to produce the revenue formerly forthcoming and to which he and his family have been accustomed. But the individual does not possess the power to tax, and in these present days he cannot develop new sources of income. If, therefore, he is to balance his budget, and thus avoid bankruptcy, there is only one thing he can do—that is, cut expenditures. Most people have already done so, some to the extreme limit that it is possible to go, others not quite so far. And the ability of the individual citizen to keep within his income is being made more and more difficult by reason of the steadily increasing taxes, which constitute a first charge upon his income.

Out of these financial difficulties, at least one good is developing. The individual citizen, who as a taxpayer is the final source of supply for all governments, is beginning to take a keener, more intelligent interest in the administration of his business by all governmental bodies. When times were fairly prosperous and taxes comparatively light—at least in his more prosperous circumstances he was able to meet them without much trouble—the average citizen gave little heed to where governmental policies and expenditures were leading. He kept on demanding more and more in the way of public services without fully realizing that, in the final analysis, he must pay for them. Now he finds that he must do the paying, and, further, that he must do without some of the services to which he has become accustomed, because he and his fellow taxpayers can no longer afford to maintain them.

Whatever may be said for or against the Russian experiment in government, at least this can be said for it, that in no country in the world, perhaps, have the masses of the people developed quite as alert an interest in their government, its policies, methods and acts. Every Russian today is almost forced to take an interest in the national policies and work of his government. He is being made to realize that he is a cog in that machine, small it may be, but important, and he must do his part.

If, as the outcome of the attempt to balance budgets throughout Canada, and elsewhere, people become more government-minded, more watchful of what the governments are doing, and, at election times, less easily swayed by appeals to petty local interests, racial prejudices and religious passions, then there will be great gain to the country as a result of the bitter experiences we are now undergoing. If the lesson is learned, and taken to heart, that as citizen-tax payers we should apply that same hard business sense to making our decisions at the ballot box that we make in the ordinary everyday business transactions in which we engage, if, in a word, we balance our judgments as citizens and electors, as well as our budgets, then a great future and, it is to be hoped, lasting gain will result from our present difficulties and financial embarrassments.

Selected Difficult Work

Blind Man Is Successful Commercial Traveller In Australia

Of all the work possible for a blind person surely that of a commercial traveller has most difficulties.

Yet news comes from Australia of a man who, though he lost his sight at the age of four, now travels to every town in Western Australia as the representative of a large firm in Perth.

Before taking on this work Mr. Harold Ackland passed the matriculation at 19, and won a University Arts degree at 22. The Braille Society paid his fees, and his members made up for the lack of text books by copying out for him by hand, pages and pages in Braille, and also reading and dictating to him.

Mr. Ackland hoped to take up Law, but this was not possible, and he started his present work. Now he is known to every railway official on the line, has a cheery greeting for them all, and is one of the happiest and busiest men in Western Australia.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It is behind it years of success. It is the sure remedy for every sufferer.

Must Be Canadian Made

The Moose Jaw Collegiate Board decided that in future all chalk and other supplies be purchased from firms handling "Made in Canada" goods. This motion was put by J. E. Chisholm. His inquiry revealed that the chalk used at the present time was made in the United States.

Prominent Military Man Dead

General John Hughes Dies At Bowmanville, Ont., At Advanced Age

General John Hughes, long a prominent figure in military and agricultural circles, and son of an illustrious family, died at Bowmanville, Ont., recently, aged 82. His health had been failing for more than a year.

Brother of the late Sir Sam Hughes and Gen. W. St. Pierre Hughes, deceased saw valorous service with the Midland battalion in the Northwest Rebellion of 1885. He was present at the operations against the hardy band of Chief Big Bear, and was mentioned in despatches, being awarded a medal with clasp. Later he rose to the command of the 48th regiment.

General Hughes was appointed to command the Sixth Infantry Brigade in March, 1906. Two years later he was transferred to the command of the Fourth Brigade, Second Infantry Division.

In honor of his long connection with Canadian militia he was elected president of the Infantry Association of the Third Division in 1911.

General Hughes found time in later life to take a leading part in the agricultural, educational and commercial affairs of the community where he resided.

Treasure Trove

Party On Cocos Island Expected To Locate Fabulous Wealth

With 100 burly Costa Rica soldiers as guards a group of Pacific Northwest treasure hunters are on Cocos Island attempting to locate supposedly fabulous wealth buried there by buccaners and pirate chieftains.

The party consists of 24 men, headed by Col. J. E. Leckie of Vancouver.

Information of the group's activities was received here by Ralph Lomen, president of the company which owns the "Silverwave," a small vessel used by the party in its voyage to the island, 300 miles west of Costa Rica.

The letter from Captain Eldred Tansen, skipper of the "Silverwave," said the Costa Rican soldiers were sent to see that their government gets a fair division of any treasure found, said to be one-third.

Miller's Worm Powders do not need the after-effect of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Memorial Scholarship

M. E. Manning Of University Of Alberta Will Go To Geneva

Award of the Elizabeth Imrie Memorial Scholarship to M. E. Manning, student at the University of Alberta, has been announced by Dr. R. C. Wallace, president of the university. The scholarship will permit Manning to spend the coming summer at the Geneva School of International Studies, and later in attendance at the assembly of the League of Nations as an observer.

It is given by Mr. and Mrs. John M. Imrie in order that a student may have the opportunity to study international political and economic life at first hand. The student selected has one more year to study before graduation in law. He is western vice-president of the Canadian Federation of University Students.

Don't be without Douglas' Egyptian Liniment. Keep it always handy. Relieves toothache, neuralgia, sore throat, quinsy, and croup. Invaluable for burns, sores, Barber's Itch and Ringworm.

Air Express Over Alps

The first air express from Crocydon, England, to the aerodrome at Cannes, France, has just been inaugurated. It brings the Riviera within seven hours of London instead of 36 hours by boat and train. The journey includes a flight over the Alps.

BABY'S OWN TABLETS

Reductions In Ocean Travel

Cunard and Anchor Lines Announce Low Rates To Europe

The Cunard and Anchor Lines announce drastic reductions in rates for travel to Europe effective immediately. The reductions will be made in all classes of travel from First Class to Third Class. A reduction of 20 per cent. will be made on all First Class, Cabin and Tourist Class rates to Europe. In Third Class, the rates which were already extremely low, have been further reduced by 10 per cent. The reductions will apply to all services of the Cunard and Anchor Lines between the United States, Canada and Europe and to all their ships, including the three Express Liners, "Beren-garia," "Aquitania," and "Mauretania."

In addition, the usual "Summer Season" increase has been dispensed with, the new low rates applying all year around. Thus, in effect passengers will be paying as much as 40% less than previously in the summer season. Some idea of the size of these reductions may be obtained from a comparison of the new minimum rates for various classes and steamers. The "Aquitania" formerly \$725 First Class in the summer season is reduced to \$200. The "Mauretania" formerly \$258 is now \$188. Cabin rates for such steamers as the "Frankonia" and "Carinthia," formerly \$155 to England and \$160 to France, are down to \$124 to England and \$129 to France. For the "Laconia," "Scythia," "Samaria," the rates are now \$122 to British ports and \$127 to France.

Cabin steamers of "A" type, such as the "Aurania," "Albatross," and "Ascania," formerly \$133 to England and \$140 to France, now take a rate of \$108 one way, and \$200 round trip to England, and \$113 one way, and \$210 round trip to France.

Tourist Class rates in the "Aquitania," and "Beren-garia," formerly \$122.50 to England, and \$132.50 to France, are now \$98 to England, and \$108 to France one way, and \$173 to England, and \$178 to France round trip. Tourist rates in cabin steamers are as low as \$84 to England.

Mothers can easily know when their children are troubled with worms and they lose no time in applying a reliable remedy—Mother's Worm Exterminator.

Canada's Poultry Wealth

A report recently issued by the Dominion Bureau of Statistics estimates the number and value of farm poultry throughout Canada for the year 1931 as follows:

Kind	Number	Value
Hens and chickens	61,575,000	\$36,908,000
Turkeys	2,232,000	1,198,000
Geese	904,000	1,385,000
Ducks	760,000	617,000

Plans Are Blocked

CARTER'S LIVER PILLS

Canada Fortunate In Offering A Wide Variety Of Attractions In Word's Greatest Playground

The majority of Canadians probably do not realize what a wonderful choice of vacation opportunities this country offers. How many of us in any one province have first-hand knowledge of the wide range of attractions of our neighboring provinces? Many no doubt have gone abroad to seek a holiday, forgetting that our own Dominion is unequalled in the exceptional variety and range of its recreational resources. Surely a country which attracts visitors from other countries by the tens of millions must have recreational features of interest to its own citizens. It is so easy to travel in Canada that an interprovincial tour is a recreation which every Canadian vacationist may well and profitably undertake. All the developed and

variety of accommodation. On the Atlantic coast, in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, are typical sea-shore resorts, where salt-water bathing, sailing and deep sea fishing are the principal attractions. The rugged beauty of this coast and the picturesque charm of the fishing villages, at the head of every inlet, cannot fail to enchant the summer visitor. Quebec's summer playgrounds are of the most varied nature including as they do, sea-shore, mountain, lake and forest resorts. Along the lower St. Lawrence, summer colonies have been established at many points. North of the St. Lawrence and Ottawa Rivers the Laurentian mountains, clothed with pine forests and dotted

Subvention On Coal Amount Payable On Bituminous Coal Shipments To Manitoba Has Been Reduced

The maximum subvention payable on bituminous coal shipments by operators to Manitoba has been reduced from \$1.50 to \$1.20 per ton, Hon. W. A. Gordon, Minister of Mines has announced. The reduction is to place all operators who ship to Manitoba on an equality without endangering the markets to Canadian coal from foreign competition.

Action follows consideration by the minister of representations made by the bituminous coal operators of the Crow's Nest Pass district. It is stated that these representations showed that the subvention order of 1931 placed the southern Alberta coal field at a disadvantage, as compared with the northern field in the Manitoba market.

Acceptances that have been granted prior to April 15, 1932, it is stated, will continue to be in force under the old maximum until the tonnages specified have been shipped.

Urges Government Control Of Production Of Radium From Great Bear Lake Pitchblende

To consider the production of radium from pitchblende ore in the Great Bear Lake as a mining industry employing any large number of men was an "absurdity." This declaration was made in the senate by General A. D. McRae, Vancouver.

After speaking of the recent discoveries in the Great Bear Lake section, and the richness in supply of these high-grade pitchblendes, the minister of mines, who is in charge of the production of radium from pitchblende ore as a mining industry, Pitchblende is a medicinal ore, required chiefly for medicinal purposes. Not by the greatest stretch of the imagination can it be pictured as an industry which will employ any considerable number of men, or be of great commercial value to the country.

"The silver deposits in this district are phenomenal. As pitchblende is generally associated with silver ore it is possible that when mining is well under way more pitchblende will be produced in connection with the mining of silver than the world then requires, and consequently our government may some day have to make provision for conservation of surplus pitchblende. He would be a very foolish prospector who would now go into the Great Bear Lake district in search of more pitchblende."

General McRae was addressing a crowded chamber in support of his resolution urging government control of the production and distribution of all radium procured from Canadian ores. Appointment of a Canadian radium commission to investigate and recommend at the next session of parliament the best methods of such control—"to give suffering humanity the greatest boon of an ample supply of radium at a moderate cost"—was advocated by the British Columbia senator.

Present control of radium by the "Belgian Trust" at an "excessive price" produced a scarcity of radium, General McRae stated while more deaths were caused by cancer than through any other disease. He considered that the government might well consider reserving all pitchblende from further dealings, and this would not interfere in the least with the mineral development of the North West Territories.

"As to claims already staked, asserted Senator McRae, 'It is agreed the holder should be generously treated. However, as the government, through its radium commission, must carry on the necessary education and regulate the distribution of radium so as to confine it to qualified users, it will probably be found that the government will either carry on the manufacture under the direction of the department of mines—a very efficient staff—or through the agency of some controlled private corporation, or perhaps under the direction of a permanent Canadian radium commission."

"In this event the arbitrary price at the mines, which, for my immediate calculations, I have adopted as \$100 a ton—five times the gold recovered per ton by the Lake Shore

mines, one of the greatest gold mines in the world—should prove an equitable if not too generous an allowance to the people who have already staked claims. Of course, this is vastly different from the values now being talked. There is 30 tons of this ore now in Ottawa. It will probably produce, if manufactured, two grams of radium worth \$100,000; that is the Belgian wholesale price of two grams of manufactured radium. Surely we are not going to start in on this basis in Canada. It is unthinkable that we should allow the pitchblende deposits of the Great Bear Lake to be developed on a basis which will enable Canadians to join with the Belgians as exploiters of suffering humanity."

After considerable investigation, General McRae said, he was very much impressed with the seriousness of the present situation in regard to the shortage of radium, "a shortage which is costing the lives of tens of thousands of cancer victims annually." He was enthusiastic of the opportunity which it would appear from government reports, "Canada has to step in and correct this world-wide situation and give to suffering humanity this great boon—an ample supply of radium at a moderate price."

The Flax-Seed Industry

Flax Grown Throughout Canada For Seed Rather Than For Fibre

Flax is a crop which is at present receiving quite a bit of attention by farmers throughout the Dominion. There are two principal uses for the crop, fibre and seed. Varieties giving the best fibre are not so well suited to seed production and at the present time, the bulk of Canadian production is devoted to flax-seed, which has reached an average of over 3,000,000 bushels annually. Some two and a half million bushels of this volume are used domestically in the manufacture of linseed oil. The varieties which are being specially developed throughout the Dominion at the present time are those which offer greatest value from the standpoint of quality of seed and high percentage of oil content.—Department of Agriculture, Ottawa.

Cost Of Education

Britain Spends Huge Sums For Educational Purposes

Nearly £100,000,000 is now being raised from the exchequer and taxable sources for expenditure on education in Britain, Sir Donald MacLean, president of the Board of Education, told the House of Commons when he submitted the board's estimates.

Sir Donald declared the reduction of 10 per cent. in teachers' salaries effected last autumn was not to be regarded as the government's view of the proper remuneration for teachers under less abnormal conditions. The position would be reviewed when the financial position of the country allowed, he promised.

At the same time Sir Donald reminded the House that British teachers were better remunerated than teachers in Europe.

The Chinese turn soy beans not only into bread and milk and cheese, but also into oil for cooking and for lamps.

Lifecost creeps of Great Britain and Ireland saved 269 persons last year.

"I want to the dentist yesterday." "Does the tooth still ache?" "I don't know. He kept it."—Des Brumner, Berlin.

W. N. U. 1932

much of the undeveloped part of the Dominion is easily accessible by train, boat, or automobile. Canada is served by two of the world's greatest railway systems and a number of smaller lines. The equipment and service are of the highest standard. Steamers built specially for pleasure cruising afford many pleasant trips along the coast and on the extensive inland water system of lakes, rivers and canals. A cruise from the head of the Great Lakes to the Maritime Provinces is nearly equal, in distance, to an ocean voyage. Good roads lead to practically all scenic and sporting territories. Canada's road system includes many thousands of miles of surfaced highways, well equipped with direction signs and danger signals. Tourist accommodation, from campsite to hotel, is available almost everywhere.

National and provincial parks in Canada cover nearly 25,000 square miles. They are areas which have been withdrawn from exploitation and are being preserved in their virgin beauty and wildness, for purposes of pleasure and recreation. The largest national parks are in the Rocky Mountains section of Alberta, a region of unsurpassed scenic splendour admirably equipped by nature for all forms of sport and recreation. There are also important parks in British Columbia, Saskatchewan, Manitoba, Ontario and Quebec. Accommodation ranges all the way from large modern hotels to log cabins and tents. Fishing is one of the chief attractions in the parks, but game animals and birds are rightly protected and their fearlessness never fails to interest visitors.

Throughout the Dominion there are many summer resort districts which offer a wide range of attraction and

with lakes constitute a vast summer and winter playground. The Eastern Townships, which adjoin the international boundary, also have a number of well-established resorts on picturesque lakes and rivers.

Ontario has perhaps the largest number and greatest variety of developed summer resorts of any of the provinces. The Thousand Islands, Lake of Bays, Muskoka Lakes, and Georgian Bay are known throughout America, but there are in addition equally attractive, only slightly less known, districts. Accommodation includes everything from campsite to palatial hotel, and cottages may be rented in any district.

In the provinces of Manitoba, Saskatchewan and Alberta, many attractive resorts are located along the shores of the lakes and rivers. The Canadian Rockies are world famous for scenic beauty and contain some of the most highly developed tourist resorts on the continent.

British Columbia, with varied and splendid scenic attractions, is a tourist wonderland. The province has majestic mountain ranges, and extensive lake area, stately forests, an extensive coast line, and many attractive resorts in settings of exceptional natural beauty.

For a number of years the Department of the Interior at Ottawa has been engaged in the promotion of the Canadian tourist industry, more especially the development of tourist travel from the United States to Canada. It is also endeavoring to influence Canadians to spend their vacations in the Dominion. The National Development Bureau of that Department will gladly furnish interprovincial road maps and other information for the use of those planning a Canadian tour, and where necessary will refer enquiries to provincial and local tourist organizations. Applicants should be as specific as possible as to the section of Canada in which they are interested, in order that available information may be supplied.

The Farm Poultry Flock

Few Departments Of Farming That Give Higher Returns

"Poultry is at last definitely recognized as one of the essential departments of every modern farm where a program of mixed farming is carried on," states George Robertson, Assistant Dominion Poultry Husbandman. "Not only is it recognized as a necessary department of farm work but more and more farmers are coming to realize that for the capital invested and labour involved there are few if any departments that give as high returns. For the mixed farm, general purpose breeds such as the Plymouth Rocks, which are good both for laying and for the production of market poultry, are recommended. A flock of a hundred such birds carefully managed are returning to many a farmer a profit over cost of feed, of from \$200 to \$500 a year, which is something not to be despised by even the most successful farmers."

Many Like Him

A negro applied for a job, and set forth his attributes without too much modesty.

"All right," said the boss, "you can have a job; and as to salary, well, I'll pay you just whatever you're worth."

"Dat's no use to me, sah," said the applicant decidedly. "Ise gettin' mo' dan dat where I is now."

WIFE (to burglar hubby, leaving for a "job")—"And don't be away as long as you were last time—four blinker years!" The Humorous, London, England.

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not get out of my pipe. I decided to try Kruschen Salts. A few days afterwards I found that the heartburn and acidity had gone; and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then ensures complete, regular and unailing elimination of all waste matter every day.

WORLD HAPPENINGS BRIEFLY TOLD

Pure diamonds have been created artificially in the laboratory of Columbia University.

Germany's unemployed at the end of March numbered 6,031,000, a decrease of 98,000 in two weeks.

Dr. Hartley Travers Farrar, geologist, who accompanied Captain Scott on his expedition to the South Pole in 1901-04, is dead.

Dr. John Stanley Plaskett, astronomer, will receive an honorary degree from McGill University at the 1932 spring convocation.

Samuel McKay, noted Indian fighter and buffalo hunter, died at Wild Horse, Alberta, recently. He was born in Winnipeg in December, 1852.

It was learned on good authority that Turkey was ready to become a member of the League of Nations and an invitation probably will be issued this year.

Lord Irwin, former viceroy of India, sailed on the "Empress of Australia" for a lecture tour in Canada under the auspices of the Massey Foundation.

An ambulance hut has been opened at Tarpot's Corner, near Southend, England, on the London-Southend Road, where 384 accidents have occurred in the last 12 months.

Rear-Admiral Sir Godfrey Paine, who died at the age of 60, was buried at sea off the Isle of Wight, after a service in the dockyard church, Portsmouth, England.

Canada's export of wheat during the eight months of the present crop year ended in March was 124,269,429 bushels. Of that amount, 150,507 bushels went to the United Kingdom.

Canada Steamship Lines

Veteran St. Lawrence River Captain Is Appointed Skipper of the S.S. "Tadoussac"

Beginning his 42nd year as Captain on the St. Lawrence River, Wilfrid Gagne is again named skipper of the s.s. "Tadoussac" in passenger fleet appointments announced by the Canada Steamship Lines.

Born in Point Au Pic, Quebec, a short distance from the Monnot Richelieu, Captain Gagne has spent almost his entire life on the St. Lawrence and Saguenay Rivers and is said to know every turn by heart. During the war Captain Gagne's knowledge of the river was put to good effect as he was given the unique and valuable work of piloting submarines from Quebec to Murray Bay, on their way to the sea. The father of eleven children, Captain Gagne is one of the best known residents of Point Au Pic.

Another veteran's appointment is also included in the announcement recently as Captain Peter McKay, skipper of the s.s. "Noronic," flagship of the Canada Steamship Lines Northern Fleet, again takes charge of the largest upper lakes liner. Captain McKay last year piloted the "Noronic" when she made her historic cruise through the New Welland Ship Canal, and became the largest passenger steamer ever to have entered Lake Ontario.

Not New To Him

The announcement of a new "bumpless" road meter, which registers every bump or dip in a paved highway surface, leads one to remark that he frequently has carried three such devices—with vocal attentions—in the back seat.

W. N. U. 1939

Was Noted Indian Fighter

Death Announced of Early Pioneer and Buffalo Hunter

Samuel McKay, noted Indian fighter and buffalo hunter, died at Wild Horse, Alberta, recently. He was 80 years of age, born in Winnipeg in December, 1852, and educated in St. John's College, one of his school chums being Rev. Archbishop Matheson, former Anglican primate of Canada.

He entered the employ of the Hudson's Bay Company at an early age, being placed in charge of the Vermilion Hills post when 18 and resigning later to become a free trader and hunter. He was credited with killing the last buffalo on Alberta plains, and as a trader, trapper, and intermediary with Indians he was said to have had few equals.

Sitting Bull was one of McKay's Indian friends and Louis Riel was well known to the daring hunter and trader.

Concluding his adventurous career, the veteran of the plainsmen married and settled down at Medicine Hat in 1882 and watched the trans-Canada railroad push its way to that point. He later moved to Wild Horse. Five sons survive McKay, B.C. W. McKay of Kamloops, B.C., is a brother.

SWANK LITTLE SPORTS TYPE THAT THE SUB-BER WILL LOVE

A school girl frock of deep bright blue woolen, assumes a military air through its grey vivid-red trim. Note the attractively shaped collar that is partially responsible for its smart individuality. The circular sleeve caps are chic details. The bow buttons tone with the collar and sleeve cuffs.

It follows the adult mode in the wrapped movement at the front. The right side of skirt is laid in plaits, a youthful idea to give simple width to the hem.

It's so easily fashioned. The saving over the original Paris model is enormous.

Style No. 715 is designed in sizes 11, 12, 13 and 14 years. Size 12 requires 3 1/2 yards of 38-inch material with 1/2 yard of 35-inch contrasting. Wool jersey, rayon novelties, velvet, cottons and flat crepe silk in plain or print are nice mediums. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON MAY 1

ISAAC AND HIS WIVES

Golden Text: "A soft answer turneth away wrath; but a grievous word stirreth up anger."—Proverbs 15:1. Devotional Reading: Genesis 26:12-25. Devotional Reading: Matthew 5:12.

Explanations and Comments

Isaac's Prosperity and Its Result, verses 12-17.—A hundredfold was the yield which Isaac obtained from his sowing, and so great were his possessions in flocks and herds, and so great was his household, that the Philistines envied him. They envied him to fill up the wells which Abraham his father had dug, and Abimelech, their king, ordered Isaac to leave. Without well Isaac could not support his livestock, and although, as his enemies admitted, he was stronger than they, he was forced to leave. He moved on and erected his camp in the Valley of Gerar.

"It used to be a mark of a gentleman that he would instantly resent an encroachment on his rights, and pick a quarrel at a moment's notice. Today that would be a mark of ill-breeding. Where education and Christian culture have done their fullest work, there is no passion and gentleness."

Trouble At Gerar, verses 18-21.—Isaac re-dug the wells which Abraham which the Philistines had stopped up, and called them by the original names. In digging for a new well in the valley he found "a well of springing water," for the underground streams were tapped where flows below the rock through the valley past Hebron and Gerar and Beer-sheba. Trouble then arose, for the herdsmen of Gerar claimed it. Isaac called it "Esek," which means "Contention," and patiently dug another one. For that the others contended also, and Isaac called it "Sitnah," which means "Hatred." It is our ignorance of the rich and voluminous records of Gerar which technique and trade figures, there are no records of great private fortunes amassed, but the effects in national well-being are everywhere in evidence.

Peat moss is undoubtedly valuable as stable litter and bedding for horses, cattle, and pigs. It prevents rot and mouth diseases, keeps the animals healthy and strong, clears hides and fur of dandruff, keeps air in the stable clean and sweet, and is easily detected and put out, being therefore much safer than straw.

While peat moss is not itself a fertilizer, it is nevertheless valuable in sandy soils for retaining the humidity of the soil, and the cleanliness of peat moss when used as litter in coops, in pens where straw is used, the atmosphere is invariably foul and heavy; with peat it is pure and wholesome, the hens are healthier, lay more eggs, and are free of insects and vermin. A single bedding of proper depth will keep the birds clean.

While peat moss is not itself a fertilizer, it is nevertheless valuable in sandy soils for retaining the humidity of the soil, and the cleanliness of peat moss when used as litter in coops, in pens where straw is used, the atmosphere is invariably foul and heavy; with peat it is pure and wholesome, the hens are healthier, lay more eggs, and are free of insects and vermin. A single bedding of proper depth will keep the birds clean.

At Beer-sheba Isaac built an altar and established his home, and also dug a well. This is the order in which his activities are recorded, and the order is not without its significance—God came first to his people, and then there in a vision at night he heard that he should be blessed for Abraham's sake. "Fear not, for I am with thee." The waves which lash the surface of the sea are only on the surface; below, the deeps are calm, Isaac, quietly leaving place after place, felt the deeps of his soul untouched. What was the loss of a well, or ten wells, to him with whom God was, for his portion, his exceeding and long-suffering, great reward.

—F. W. Robertson.

At Beer-sheba Isaac built an altar and established his home, and also dug a well. This is the order in which his activities are recorded, and the order is not without its significance—God came first to his people, and then there in a vision at night he heard that he should be blessed for Abraham's sake. "Fear not, for I am with thee." The waves which lash the surface of the sea are only on the surface; below, the deeps are calm, Isaac, quietly leaving place after place, felt the deeps of his soul untouched. What was the loss of a well, or ten wells, to him with whom God was, for his portion, his exceeding and long-suffering, great reward.

Many people of our time, despite their high civilization, are far behind the humble Hebrew patriarch in the true ordering of their lives. Most of them see only their lives—the circle of their interests; they have no place for either altar or well. They forget God who should be first in life, and the people of tomorrow who ought to benefit by their toils here. Others dig the well, thus providing a social blessing, but they have no place for an altar. The great test is, that which combines, and in the right order—altar, tent, and well.

A soft answer turneth away wrath. Patience is not weakness. He who bears injury without resentment triumphs in the end. "Blessed are the meek, for they shall inherit the earth."

Valuable Muskegs Of Western Canada

New Resource That Is Now Creating

Western Canada, in common with some other places, is waking up to the existence of a new and valuable resource in its muskegs. Recent investigations by the Industrial Development Board of Manitoba, with Mr. A. Anrep, past specialist of the Ottawa Department of Mines, have brought to light many facts regarding the new resource that are occasioning widespread interest, and have revealed peat deposits of considerable extent and value in the bogs near Whitecourt.

"Muskeg," according to one authority, is probably the most useful word in the Cree language, and no other language seems to possess a word so comprehensive. It denotes either any kind of bog, or the material contained in a boggy deposit. Previously, people in Western Canada attached no value to this resource, regarding it as merely a troublesome impediment to transportation, or else as productive only of an inferior sort of fuel. But the studies of the Industrial Development Board, which have taken cognizance of the remarkable exploitation of bogs and moors in European countries, are developing an entirely new attitude toward Western muskegs, and today some authorities regard peat as a resource taking precedence in the industrial world to petroleum, rubber and cotton.

We may pause here to set out in brief some of the uses of sphagnum moss, peat, peat mulch, peat board, etc. They include: Insulating material for buildings, agricultural and horticultural purposes; packing for preserving fruit, vegetables, fish and meat; surgical dressings; fuel; for stables, war board, deodorant; wall plaster, etc., etc.

Mr. Anrep, who comes of a family of peat specialists, makes the following note regarding it: "On account of its high absorptive powers, from which it has its own weight in nature (while straw absorbs only three times its weight) and of its acid quality, it is a natural sequestrant, as an antiseptic and germ-destrory factor, and because of this it is a great gift of nature, for the use of the people at large."

Very strong claims are made for it as an insulator of heat. It is urged that if peat insulation were used in the rural and urban dwellings of Western Canada, it would save vast sums in fuel bills.

"We use 116 per cent. more fuel than is necessary," declares Mr. D. C. McArthur, one of the one of the tributes we pay to ignorance.

And Mr. McArthur says further: "The rather voluminous records of Gerar which technique and trade figures, there are no records of great private fortunes amassed, but the effects in national well-being are everywhere in evidence."

Peat moss is undoubtedly valuable as stable litter and bedding for horses, cattle, and pigs. It prevents rot and mouth diseases, keeps the animals healthy and strong, clears hides and fur of dandruff, keeps air in the stable clean and sweet, and is easily detected and put out, being therefore much safer than straw.

While peat moss is not itself a fertilizer, it is nevertheless valuable in sandy soils for retaining the humidity of the soil, and the cleanliness of peat moss when used as litter in coops, in pens where straw is used, the atmosphere is invariably foul and heavy; with peat it is pure and wholesome, the hens are healthier, lay more eggs, and are free of insects and vermin. A single bedding of proper depth will keep the birds clean.

While peat moss is not itself a fertilizer, it is nevertheless valuable in sandy soils for retaining the humidity of the soil, and the cleanliness of peat moss when used as litter in coops, in pens where straw is used, the atmosphere is invariably foul and heavy; with peat it is pure and wholesome, the hens are healthier, lay more eggs, and are free of insects and vermin. A single bedding of proper depth will keep the birds clean.

An extremely interesting use of sphagnum moss is for surgical dressings. During the Great War, Sir Lyster Brunton, famous English physician, made extensive use of dressings of this sort. In Scotland, Ireland and Canada, vast numbers of sphagnum plants for this purpose were collected. Dr. John Rossall, former Department of Mining Engineering, McGill University, supervised the collections here. The moss is a strong disinfectant, a non-deodorizer, antiseptic, and a non-carrier. Its absorptive qualities are such that it can be used for three years of the waste more than 6,000,000 bandages were used.

This valuable resource, peat moss,

"YEARS CAN BRING YOU ADDED CHARM!"

SAYS JACK HOLT

"Some women seem to grow more alluring every year," says Jack Holt. "Birthdays only add to their charm!"

"Here in Hollywood you see them every day—actresses still every bit as youthful as ago, more poised, more irresistible than ever. Still the idols of an adoring public!"

"No matter what her age, a woman who has the fresh, glowing charm of youth is always attractive."

"I should think every woman would learn to make the most of her age, a woman who has the fresh, glowing charm of youth is always attractive."

"You will want to know that the lovely stars keep right through the years!" "Guard complexion beauty as you do!" they will tell you, "with Lux Toilet Soap!"

Important actresses of the world—over—in Hollywood—(686 of the 694 there!)—on the list of the most beautiful women in the world. Europe—depend on this fragment, amazingly white soap for every type of skin. The caress of dollar-a-cake French soap for 10c.

is spread practically throughout Canada. In Western Canada, one of the finest deposits occurs about 45 miles east of Winnipeg, near Whitecourt, Manitoba. Here a vast bog system extends for 18 townships. In quantities of millions of tons, every variety of bog material is available. There are moss-bogs and grass-bogs, litter and peat deposits, muck and humus, high acid content and high nitrogen content. The bog system is traversed by three railways and three highways. It is a vast bog system. Whitecourt system contains in an area of 500,000 acres more than 325 million tons of organic material at the accepted stage of commercial dressings. Along the Hudson Bay Railway, in Northern Manitoba, there are still larger bogs.

Wanton burning and unnecessary drainages are doing away with many valuable peat bogs in Canada. Recently very powerful arguments were made against draining off the natural waters of the West, by experts discussing the drought conditions and lack of rainfall on the prairies. People are now learning that the muskegs are valuable, not only for their peat resources, but as humidifiers of the air.

A vast amount of information on this subject has been assembled by the Industrial Development Board of Manitoba, and efforts are now under way to have the Whitecourt peat resources properly developed.

"Audible Light" Created

Phonograph Produces Music As Beam From Lamp Hits It

By means of a photo-electric cell, John Bellamy Taylor, consulting engineer for the General Electric Company, demonstrated the creation of "audible light" before a group of scientists at Detroit. He used a silent phonograph and sensitive incandescent lamp to produce what he termed "one of the newest developments in electro-physical research."

In his demonstration, Mr. Taylor brought the music of a stringed orchestra from the phonograph and then silenced it by placing his hand between the lamp and electric cell.

"Don't you need a lifebuoy?" "No. Once they threw me to a drowning man as a lifebuoy!"—Megendorfer Blaetter, Munich.

U.S. ATTACKS ON WHEAT POOL ARE REFUTED

Ottawa, Ont.—That the co-operative wheat pool movement in Canada has been selected by propagandists in the United States and improperly cited by them in their fight against the co-operative movement in that country is a matter of regret, and ought not to be allowed to pass without answer. This is the opinion of Hon. H. H. Stevens, Minister of Trade and Commerce, expressed in a statement made public here.

Referring to articles published in Chicago and elsewhere in the United States to the effect that Canadian wheat pools had accomplished the "ruin of Canadian wheat farmers" who were threatening to "strike against taxation" and talking "secession," Mr. Stevens declared that Canadian wheat pool members still had faith in their co-operative organization and were shipping a large portion of their grain through pool elevators. Furthermore, no losses have been sustained by farmer members of the wheat pools other than that they were disappointed at not obtaining further sums for their 1929 wheat sold through the pools owing to the sudden drop in prices.

"The profits of farmer-owned handling facilities have always been very large, and no doubt will rapidly repay the advances (made by the prairie governments) without any loss to the governments concerned," said the minister.

"The situation in respect to the wheat pools in the three prairie provinces," said Mr. Stevens, "is substantially as follows:

"Three pools, previously operating under a contract with their grower members, have released those members from the operation of that contract. The holdings of the wheat pools as pools are gradually being liquidated by the pools themselves as market opportunities afforded, being only assisted by the Dominion Government in their financing. Pools, however, are operating through subsidiary elevator companies independently which are still solvent and are in no danger of liquidation. Certain losses amounting to some \$22,000,000 were sustained by the pool on the 1929 crop, the advance payment to their farmer members proving excessive in view of the slump in the market. These losses were guaranteed by the various provincial governments, according to the provincial interest, in approximately the following proportions: Alberta, \$6,500,000; Saskatchewan, \$13,000,000; Manitoba, \$2,500,000. The provincial governments have made good these amounts to the banks and have negotiated agreements with the pools for the repayment, which will be done out of the earnings of the subsidiary elevator companies and other assets of the pools. To secure themselves, the various provincial governments have taken a first charge over the assets of the pools, namely elevators, terminals, etc., of an approximate value of some \$30,000,000. No losses were sustained by the farmer members other than the disappointment of not obtaining further sums for their wheat sold through the pools. This, of course, is a contractual liability.

New Zealand Will Censor All Messages

To Prevent Alarmist Reports Being Cabled Overseas

Wellington, N.Z.—A censorship of messages sent abroad will be instituted by the government in order to prevent alarmist reports concerning possible recurrence of disorders in Auckland or elsewhere being cabled overseas. The government has decided to enforce the provisions of the postal regulation which gives this power.

Meanwhile both houses of parliament have passed the government's bill seeking emergency powers to deal with disturbances such as those at Auckland when mobs of unemployed got out of hand and did considerable property damage and looting.

W. N. U. 1939

Cattle Export Problems

Will Probably Come Before Imperial Economic Conference

Ottawa, Ont.—Senator Arthur Meighen, Government leader in the Upper House, announced that problems facing cattle exporters would be brought to the attention of the chairman of the committee arranging for the Imperial Economic Conference which meets in Ottawa in July.

Canadian cattle encountered many restrictions when entering the British market, said Senator D. E. Riley, introducing the subject. Nothing would help Canadian agriculture more than the improving of the live cattle trade.

Canadian cattle encountered less favorable conditions in the British market than Irish cattle, he said. A total of 26,000 cattle crossed the ocean last year but the trade could be developed to a greater extent than this, if restrictions were modified. The best opportunity to review the cattle trade would be at the conference table.

Organization of the conference agenda was under the supervision of the cabinet said Senator Meighen.

Memoiranda being prepared on tariffs, exchange, currency and other topics and he would undertake to bring to the attention of the government the important subject of the cattle trade.

Would Pool Railway Operations

Operating Board To Run The Two Systems Suggested By Conservative Members

Ottawa, Ont.—Pooling of the operations of the Canadian National and Canadian Pacific Railways, with a resultant saving of possibly \$80,000,000 a year, was the suggestion thrown into the budget debate in the House of Commons. The appointment of an operating board to run the two systems as one, with consequent elimination of waste and duplication, was held up as a possible temporary solution of the serious transportation problem which Canada is faced. While operations would be pooled, the roads would remain as distinct entities. The properties would stay just as they are today.

J. T. Hackett (Conservative, Standstead) made the suggestion. He declared parliament must "stem the gush of financial life of this country" by grasping any opportunity to solve the problem. His proposal, he asserted, was merely temporary, and he expressed hope that the transportation commission would have some beneficial remedies to offer.

Boost Gasoline Price

Toronto, Ont.—One cent per gallon increase in the price of gasoline, effective throughout the greater part of the Dominion, April 21st, was announced here by the Imperial Oil Company. The increase, said by the company to be necessary to offset in part a jump in crude oil prices, affects Ontario, most of Quebec provinces, and Manitoba, Saskatchewan, and Alberta.

Build Village For Athletes

Los Angeles, Calif.—Like the ghost towns of the old gold rush days in California, there has grown in the Baldwin Hills, near here a cluster of 500 houses in less than three weeks. It is the Olympic village, where some 2,000 of the world's picked athletes will live for a few weeks this summer. The last of the houses has been erected.

Ask Tax Removal

Ottawa, Ont.—A large delegation of ice cream manufacturers waited upon members of the government, with a request for removal of the six per cent. sales tax on their product, provided in the budget now before the House of Commons.

Drug Addicts In Canada

Ottawa, Ont.—Every effort had been made in Canada to restrict the drug traffic yet it was estimated there were 8,000 addicts in this country. Rt. Hon. Arthur Meighen told the Senate.

The Southern Railway of England has ordered 44 electric motor coaches for its new electric lines.

Fishermen of Scotland will combine to control herring prices.

SOVIET FLOT VICTIM

Charging that Soviet Russia is out to ruin him and to destroy public confidence in his enterprises, Sir Henry Detering, British oil magnate, recently told how Soviet agents by a two-year campaign of lies have attempted to depreciate the value of stock exchange shares. At various times these agents circulated rumors that Sir Henry had absconded, that he was dead, and that he was bankrupt, in order to secure his stocks.

Economic Conference

Parliament To Discuss Matters Pertaining To Important Event

Ottawa, Ont.—Parliament will probably hear a discussion on the Imperial Economic Conference shortly. When the vote of \$250,000 to defray expenses of the Empire gathering comes before the Commons, Rt. Hon. R. B. Bennett is prepared to set aside a day for members who may wish to give their views, and may himself make a brief statement.

With definite assurances that all parts of the Empire will be represented by prominent delegates at the opening of the conference here on July 21, the "spade" work is being pushed forward. Committees, sub-committees and inter-departmental organizations are hard at work.

Under the supervision of the cabinet and a cabinet sub-committee, departmental committees are gathering essential information and making preparations.

The agenda itself has not been completed. When that stage has been reached, the question whether or not a completed agenda will be laid before the House will depend on what is thought desirable after consultation with all the governments concerned.

Delegates From Russia

Ottawa, Ont.—Extended an invitation to participate in the Fifth Pacific Science Congress, scheduled to meet in Canada in 1933, Russia has accepted and the Union of Soviet Socialist Republics will be represented by at least ten official delegates. The congress sessions will be held in Vancouver and Victoria, B.C.

ANGLO FRENCH CONFERENCE AT 10 DOWNING STREET

M. Andre Tardieu (left), French Foreign Minister, and Premier Ramsay MacDonald, of Great Britain (right), are photographed in a happy mood as they met in the garden of the Prime Minister's residence at 10 Downing Street, London, England. In the background, between the two statesmen, can be seen Right Hon. Walter Runciman, one of the British delegates to the informal conference.

Mine Shaft Extended Into Saskatchewan

Flin Flon Development Should Encourage Mining In Province

Regina, Sask.—The shaft of the huge Hudson Bay Mining and Smelting Company Mine at the Flin Flon now extends into the Saskatchewan border, according to Major J. Barnett, Deputy Minister of Natural Resources for the Province. Hitherto all the mining for copper, zinc and gold which has been done has been on the Manitoba side.

Major Barnett has returned from a visit to the northland and at the Hudson Bay Junction held conference with field men of the Department on forest fires and other work to be carried out in the north this season.

The extension of the shaft over the Saskatchewan border and the subsequent mining, should encourage smaller mines to start up in the opinion of Major Barnett. The presence of the \$30,000,000 plant of the mining company will enable the small miner in Saskatchewan to use the facilities in processing the raw material.

The mine is now working the full 24 hour shift, and there is considerable activity at that point.

Police Watching Border

To Prevent Unemployed In States From Entering Canada

Ottawa, Ont.—Immigration and customs officials of the Dominion Government with members of the Royal Canadian Mounted Police are closely co-operating to prevent the unemployed of the United States from entering Canada.

Provisions of the Immigration and Labor act will be applied in a strict manner to job seekers who attempt illegal entry into Canada. Some months ago an order-in-council, especially dealing with contract labor, was passed. These provisions, which will likewise be rigidly enforced, are aimed to prevent the entry of people who come to this country under a contract of employment or to negotiate for employment.

Hidden Explosives

Moisture Saves Workmen From Death When Hammer Strikes Dynamite

Victoria, B.C.—Fifty sticks of dynamite, with a handful of detonators, have been taken from the middle of the new Mount Douglas road by Saanich workmen and destroyed.

Only the heavy downpour of rain which marked the week-end saved the men from being blown up when one of the workers drove his mactack through the sack of explosives.

The dynamite was buried six inches below the surface of the gravel pit at the crest of the hill. The condition of the sack indicated that the explosives had been hidden about eighteen months ago, at the time when Spanish was carrying out extensive clearing operations on the roadway.

GIVE RESULTS OF RUST-RESISTANT WHEAT TESTS

Winnipeg, Man.—Varieties of rust-resistant wheat which have been tested so far for milling and baking qualities appear to be quite satisfactory in that respect. L. H. Newman, Dominion Cerealist, told members of the associate committee on field crop diseases of the National Research Council, at the second session here of their annual meeting.

The committee is considering the preparation of a statement following this meeting showing the results of tests of rust-resistant wheat developed by the various organizations co-operating in the effort to place such a wheat in farmers' hands. "Thirteen varieties of this wheat used in the experiment described to the meeting by Dr. C. H. Goulden, of the Winnipeg rust laboratory, show good results in the length of its straw, in its weight, in its yield per acre, and in the number of days it takes to mature."

Dr. F. J. Greaney, also of the laboratory, reported it had been proved sulphur dust will protect grain from the attacks of rust, although it will not help a plant which has already been infected. He said efficient methods of spreading the sulphur dust had been developed, but they might not come into general practical use here because of economic conditions.

The accurate identification of fungi is an important step in rust research, and a difficult one, Prof. A. H. Buller, of the University of Manitoba, told the members. He suggested better library facilities here would greatly aid the work.

Dr. O. S. Aamodt, University of Alberta, outlined for the committee progress which has been made in testing certain varieties of drought-resistant wheat brought to this country from Russia in 1928. Emphasizing the importance of this branch of research in breeding, he urged further intensive study through practical field tests be conducted in the varieties which had already been brought down to the segregating generations, and said the cost of equipment for the work would not exceed \$500.

B.C. Placer Mining

Would Put Unemployed To Work Panning Gold

Victoria, B.C.—Plans for putting unemployed men to work washing gold in the streams of British Columbia are being given consideration here between the government and officials of the mines department.

Under a scheme discussed in a general way at the recent unemployment conference at Ottawa, it is proposed that unemployed men, who desire to do so, shall be given gratuities which will enable them to carry on placer operations. They would repay the cost of their maintenance and keep any amounts which they made over and above that.

Mines department officials believe that in many parts of the province men working in small numbers could make enough to support themselves, and many, with luck, could make reasonable wages.

Perjury Charge Dismissed

Quebec, Que.—The charge of perjury preferred against Capt. J. E. Bernier, widely known Canadian explorer and navigator, following a complaint made by Raoul Farvey, a seaman, was dismissed by Magistrate Ferdinand Roy recently. Harvey claimed the captain perjured himself when called to testify before the Dominion wreck commissioner's inquiry into the sinking of the s.s. Guide, in 1926.

Trade Treaty With Cuba

Ottawa, Ont.—The Canadian Government is considering entering into a reciprocal trade treaty with Cuba with a view to creating a market for Canadian potatoes. This information was contained in an answer of the secretary of state in the House of Commons to a question of Oscar Boulanger (Liberal, Bellechasse). A request to institute the treaty was received from a group of farmers of New Brunswick.

DON'T MISS THE UNITED CHURCH BIG GOSPEL RALLIES!

— AT —

Holborn Hall on May 1st, at 3 P.M.;
Bright Bank, on May 8th, at 3 P.M.;
Sand Hills School, May 15, at 3 P.M.

Orchestra, Singers, Speakers from
Beulah Tabernacle,
Edmonton.

REV. G. A. SAUDER, :: PASTOR.

A Course of Lectures on Christian Fundamentals.

What does the Church stand for?
What are the principal doctrines of Christian religion?
What does the Church teach regarding creation, redemption,
life, death, resurrection, heaven, hell, etc?
What principles does the Church espouse?
What claim has it upon my interest and attention?
Has the Church something that I need?
Does it solve the problems of my life?

The answers to these and similar questions are given in a series
of lectures for adults, which are held on Every Tuesday Evening
from 8 to 9 o'clock.

Everybody is invited to these Lectures. Attendance involves no
memory work, nor any obligation as to eventual membership in the
Church.

The Lectures are for such as wish to become familiar with the
doctrinal position of the Lutheran Church.

Attendants at the course will at the conclusion of the Lectures
be eligible for Church membership; but no pressure will be brought
to bear on them towards affiliation with the Church.

Our own Church members are welcome to join the Class.

PASTOR KURING will conduct this Class at St. Matthew School
No. 2, Stony Plain.

CONFIDENCE!

Farmers who do business with this Company
are confident of safety, of good treatment
and efficient service. That is based on the
company's record and reputation and the
experience of western farmers during more
than a quarter of a century.

Tripp Cancelled

The manager of the Wal-
ter League Players, who had
been touring in "Civil Ser-
vice," had planned on taking
his company up to Onoway
where they were billed for a
one night stand last evening,
the 27th, but the condition of
the roads did not permit the
trip to be taken.

United Church Notes.

On Sunday last, owing to
the impassable condition of
the roads, the service at
Bright Bank was cancelled.
Enthusiastic services were
held, however, at Spruce
Grove and Stony Plain. The
Pastor speaking on the sub-
ject of Temptation.

The rapidly drying roads
are making it possible for
the special rally at Holborn
Hall. It is hoped that all will
co-operate in making these
rallies a splendid success. The
artists from CHMA broadcast
station will be on hand with
a splendid orchestra, special
singers and speakers.

Dominion Tax on Telegrams.

The new Dominion tax
changes, as announced last
week, include a 5c tax on tele-
grams, cables and radio mes-
sages, and long distance calls.
On railway sleeping car berths
the tax will be 10 p.c., with
a minimum of 25c., and 10c.
on chair car tickets.

Rates Cut on Atlantic Liners.

In keeping with the trend
to reduce prices that is pre-
valent thruout the country, vir-
tually all the major steamship
lines announce reductions in
transatlantic passenger rates,
ranging from 10 to 50 p.c.
The cuts will bring the rates
to the lowest since 1914.

Church Services.

German Lutheran services will
be held in Stony Plain next Sun-
day at 2.30 p.m.
United Church service every
Sunday Evg. at 7.30.

Sunday, May 15, there will be
Lutheran services at St. Matthew
Schoolhouse at 7.30 p.m., by Rev.
H. Kuring.

Lecture on "Christian Funda-
mentals" by Pastor Kuring, at St.
Matthew Schoolhouse No. 2, May
3d, at 8 p.m.

Gospel Rallies Schedule.

Sunday, May 1, Holborn Hall
Sunday, May 8, Brightbank
Sunday, May 15, Sand Hill School

Heard on Main Street.

Diner—Two eggs, poached me-
dium soft; buttered toast, not too
hard; and coffee, with not too much
cream it.

Mag—Very good, sir. Would
you like any special design on the
dishes?

Won't Let Go.

Jac—The hand that rocks the
cradle rules the world.

Gus—Just so; but the trouble
nowadays is that the hand that
ought to rock the cradle won't let
go the steering wheel.

The Nifty Mechanic

A lady driver ran into another
vehicle and bent a fender. It wor-
ried her; so she stopped at a gar-
age and asked the mechanic if he
could repair the fender so her hus-
band wouldn't know that it had
been bent.

The mechanic looked at the bent
fender and replied:

"No, lady, I'm afraid I can't;
but I'll tell you what I can do—I
can fix it up so that in a few days
you can ask your husband how it
bent it."

Alberta Musical Festival

Intending competitors in
the Alberta Music Festival to
be held in Edmonton May
17 to 20 are reminded that the
closing date for all entries
is May 1st. Entries should be
mailed to Secretary Turner,
8421 112th St., Edmonton.

Railway Time Table

Going West—Every morning
at 11.44.
Going East—Every afternoon
at 3.44.

GLYCERIN MIX REMOVES CAUSE OF STOMACH GAS

Simple glycerin, buckthorn bark,
saline, etc., as mixed in Adlerika,
acts on BOTH upper and lower
bowel, removing poisons you never
thought were there and which caused
gas and other stomach trouble. Just
ONE spoonful relieves GAS, sour
stomach, sick headache and consti-
pation. Don't take medicine which
cleans only PART of bowels but let
Adlerika give you a REAL cleaning
and see how good you feel! It will
surprise you! J. F. CLARKE, Drug-
list.

THE STONY PLAIN SUN

Spruce Grove News.

Mr Edmund Pinchbeck left
Sunday last, on a trip to O-
tawa.

Members of Spruce Grove
Community League are hold-
ing a public dance in the
Winterburn Community Hall
tomorrow (Friday) evening,
the 29th.

The Young People's So-
ciety held another of their pop-
ular meetings last evening,
the 27th.

Mr Silver Joss arrived last
week from Brussels, Belgium,
and intends to stay the com-
ing summer on the Capt. Gib-
son farm.

Members of the Young
People's Society enjoyed a
splendid evening at Captain
Gibson's farm the evening of
Wed. April 20. The Captain
had a surprise by having a
winner.

The new Brox general store
which threw its doors open
last week, had a busy day on
Saturday, when Mr. Walter
was receiving congratulations
of his friends on the success
of his enterprise.

Things were rather quiet in
the village during the period
when the buses and trucks
had stopped running.

Specially Arranged Tours.

Something new in trans-
Canada holidays, in which the
railway, auto and steamship
will be combined in pleasing
variety, is offered for the com-
ing summer thru two special
tours now being arranged by
Canadian National Rys, for
July and August. Those who
take part in these tours will
travel over 8000 miles of
Canadian territory, 6000 miles
by train, 1500 miles by steam-
er on the Great Lakes and
Pacific coast, and over 500
miles by motor car in Rockies
and the principal cities vis-
ited.

All the larger cities on the
prairies will be included in
the itinerary together with a
triangle trip by steamer be-
tween Vancouver, Victoria
and Seattle, with two days
on the inland seas between
Vancouver and Prince Rupert.

YOU CANNOT AFFORD
TO BE WITHOUT YOUR
LOCAL PAPER—SUB-
SCRIBE NOW AND KEEP
PAID UP.

Starting on May 4th,
the places of business
in Stony Plain will
close at 1 p.m. on
Wednesdays.

WHY SUFFER FROM HEADACHES,

Pain in and around the Eyes?
The right glasses fitted to your
eyes will surely relieve you and give
you comfort.

Glasses furnished Free.
Ten dollars examination fee.
That is far cheaper than paying \$3
to \$10 for an examination and then
glasses at \$12 to \$15; but if you cannot
see the logic of this; you need more
than glasses.

Friday, May 6th.

Too Sick for School

Mrs. Dow Says Dr. Williams' Pink Pills Restored Daughter to Health.

"My daughter was rundown in health, took weak spells and could not go to school," writes Mrs. Asa Dow, Fort Daniel West, Quebec.

"While visiting her aunt, a friend told her about a little girl in similar condition who had been completely restored to health by Dr. Williams' Pink Pills. My daughter has since been taking the Pills, and they have certainly made her stronger. She has lost that tired, sluggish feeling and has never missed one day's school since September. The Pills also gave her a good appetite; her nerves are better and she has more pep. I recommend Dr. Williams' Pink Pills to mothers of daughters with similar troubles."

Don't let ailments rob your growing daughter of health and vigor. Give her Dr. Williams' Pink Pills. They are no temporary relief. They build the condition by creating new blood which imparts health, vigor and vitality. Equally good for all run-down or nervous conditions. At your druggist's, 50c. 274

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author of "The Splendid Folly of the Hermit of Fort Esau," Holder & Stoughton, Ltd., London.

CHAPTER XIX.—Continued.

"The skunk!" muttered Nick wrathfully.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A sound—the light crunching of gravel beneath a footstep—had come to her strained ears.

"Nick! Did you hear?" she breathed.

A look of keen anxiety overspread his face. For himself, he did not care; Adrian Latimer could not hurt him. But Claire—his "golden narcissus"—what might he not inflict on her as punishment if he discovered them together?

The next moment it was all he could do to repress a shout of relief. The steps had quickened, rounded the corner of the alley, and revealed—Jean.

"We're mighty glad to see you," remarked Nick, as she joined them. "We thought you were the devil himself"—with a grin.

"Oh, he's safe for half an hour yet," Jean reassured them. "I asked Tucker," the Latimer's butler, who wore a striped ground Claire walked on—"and his solicitor is still with him. Otherwise I wouldn't have risked looking for you"—smiling. "I knew Nick was over here, and Sir Adrian might have followed."

"You're sure he hasn't?" asked Claire nervously. "He is so cunning—so stealthy."

"Even if he had, you're doing nothing wrong," maintained Jean stoutly. "Everything I do is wrong—in his eyes," returned Claire bitterly. "That's what makes the misery of it. If I were really wicked, really unfaithful, I should feel I deserved anything I got. But it's enough if I'm just happy for a few minutes with a friend for him to want to punish me, to—suspect me of any evil. Sometimes I feel as if I couldn't bear it any longer!"

She flung out her arms in a piteous gesture of abandonment. There was something infinitely touching and forlorn about her as she stood there, as though appealing against the hideous injustice of it all, and with a little cry Jean caught her outstretched hands and drew her into her embrace, folding her closely in her warm young arms.

Nick had turned aside abruptly, his face rather white, his mouth working. His powerlessness to help the woman he loved half maddened him.

Meanwhile Jean was crying little, inarticulate, caressing sounds above

Claire's bowed head, until at last the latter raised a rather white face from her shoulder and smiled the small, plucky smile with which she usually managed to confront outrageous fortunes.

"Thank you so much," she said with a glint of humour in her tones. "You've been dear, both of you. It's awfully nice to—to let go, sometimes. But I'm quite all right again, now."

"Then, if you are," replied Jean cheerfully, "perhaps you can bear up against the shock of too much joy. We want you to have a day out."

"What do you mean?"

"I mean we're organising a picnic to Dartmoor, and we want to fix it so that you can come too. Didn't you tell me that Sir Adrian was going to be away one day this week? Going away, and not returning till the next day?"

Claire nodded, her eyes dancing with excitement.

"Yes—oh, yes! He has to go up to London on business."

"Then that's the day we'll choose. Heaven send it be fine!"—placably.

"Oh, how I'd love it!" exclaimed Claire. "I haven't been on the Moor for such a long time."

"I've never been there at all," supplemented Jean.

"Nick! Nick!" Claire turned to him excitedly. "Did you know of this plan? And why didn't you tell me about it before?"

He looked at her, a slow smile curving his lips.

"Why, I never thought of it," he admitted. "You see—explanatorily—when I'm with you, I can't think of anything else."

"Nick! I won't have you making barfaced love to a married woman under my very nose," protested Jean equably. And the shadow of tragedy that had lowered above them a few minutes earlier broke into a spray of chery fun and laughter.

"You seem very gay today."

The cold, sneering tones fell suddenly across the gay exchange of jokes and laughter that ensued, and the trio looked up to see the tall, lean, black-clad figure of Sir Adrian standing at the end of the path, awaiting their approach.

To Jean, as to Claire, occurred the analogy of a malevolent spider on the watch. Even the man's physical appearance seemed in some way to convey an unpleasant suggestion of resemblance—his long, thin, sharply-pointed arms and legs, his putty-coloured face, a livid mask lit only by a pair of snapping, venomous black eyes, half hidden between patches of folds of wrinkled skin, his long, predatory mouth with its slow, malicious smile. Jean repressed a little shudder of disgust as she responded to his sneering comment.

"We are—quite gay, Sir Adrian. It's a fine day, for one thing, and the sun's shining, and we're young. What more do we want?"

"What more, indeed? Except"—bowing mockingly—"the beauty with which a good Providence has already endowed you. You are a lucky woman, Miss Peterson; your cup is full. My wife is not, perhaps"—regarding her appraisingly—"quite so benefit-entitled by Providence, so it He paused, and as the black, pin-point eyes beneath the flabby lids detected the slight stiffening of Claire's slender figure, his long, thin lips widened into a sardonic smile.

"Yes, to the brim," he repeated with satisfaction. "That's a husband's duty, isn't it, Mr. Brennan?"—addressing Nick with startling suddenness.

"You should know better than I, Sir Adrian," retorted Nick, "feeling that you have experience of matrimony, while I have none."

"But you have hopes—aspirations, isn't it so?" pursued Latimer suavely. There was an undercurrent of disagreeable suggestion in his tones.

Nick was acutely conscious that his keenest aspiration at the moment was

Sharp Pains in His Heart Nerves in Bad Condition

Mr. Fred J. Chase, Thomson Station, N.B., writes:—"I have used Milburn's Heart Nerve Pills with wonderful results."

My heart would beat so fast I would have to sit down when at work shopping in the woods. I had sharp pains in my heart when I would lie down at night.

My nerves were also in a very bad condition, but after using two boxes of Milburn's Heart Nerve Pills I feel just fine, and am fourteen pounds heavier than I have been for years."

MILBURN'S HEART NERVE PILLS

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Toronto, Ont.

You can cook 3 vegetables AT ONCE

in the same saucepan by using

CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment.

There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up. When roasting meat, line your pan with Canapar. Fat and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar repeatedly by simply rinsing it off and hanging it up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread lint. Made by the makers of the famous FALMAY Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, druggists and department stores have Canapar on sale. But if yours don't, send for a sample. We'll give you a new and unique booklet entitled "Canapar Cookery", containing one hundred recipes as a bonus for your trouble.

Applied Food Products, Ltd.,

Haslemere, Surrey, England.

Enclosed find 25c for which please send me one full size package of Canapar Cookery Parchment, and your 100 recipes.

to knock the creature down and jump on him.

"We must find you a wife, eh, Claire? Eh, Miss Peterson?" continued Sir Adrian, rubbing the palm of one long hand slowly up and down over the back of the other. "I'm sure, Claire, you would like to see so—intimate—a friend as M. Brennan happily married, wouldn't you?"

"I should like to see him happy," answered Claire with tight lips.

"Just so—just so," agreed her husband in a queer, cackling tone as though inwardly amused. "Well, get him a wife, my dear. You are such friends that you should know precisely the type of woman which appeals to him."

He nodded and turned to go, gliding away with an odd shuffling gait, and muttering to himself as he went: "Precisely the type—precisely."

As he disappeared from view down one of the branching paths of the shrubbery, an odious little laugh, half chuckle, half snigger, came to the ears of the three listeners.

Claire's face set itself in lines that made her look years older than her age.

"You'd better go," she whispered unevenly. "We shouldn't be able to talk any more now that he knows you are here. He'll be hovering round—somewhere."

Jean nodded.

"Yes, we'd better be going. Come along, Nick. And let us know, Claire," as soon as you have found out for certain what day he goes away. You can telephone down to us, can't you?"

"Yes, I'll ring up when he's out of the house some time," she answered. "Or send a message. Anyway, I'll manage to let you know somehow. Oh!—stretching out her arms ecstatically—"Imagine a day of utter freedom! A whole day!"

(To Be Continued.)

A pliable rubberized material, resembling leather but not greatly affected by moisture, that entered the field as a competitor of leather.

Be natural, borrowed garments seldom fit well.

W. N. U. 1939

Non-Stop Flight Across Canada

Vancouver Sun To Sponsor Flight From Montreal To Vancouver

The Vancouver Sun has announced that it is sponsoring a projected non-stop flight across Canada from Montreal to Vancouver on June 21 next by two Vancouver aviators, R. H. Storer and B. R. Ronald. Refueling contacts are planned at Winnipeg and Calgary.

If successful the flight would be the first non-stop across Canada and the first attempt at refueling in the air for a long-distance hop in the Dominion.

Storer and Ronald plan to leave Vancouver early in May and fly to Montreal by easy stages.

They expect to leave Montreal at 3 o'clock in the morning of June 21, taking advantage of the long daylight hours, to make the flight from dawn to dusk. Flying westward with the sun they hope to make the distance in 21 hours and land here around 6 o'clock in the evening, Pacific Standard Time.

An additional advantage in flying westward is in avoiding the necessity of taking off at sea level with a heavy load of gasoline to make the long climb over the Rockies.

The air-line distance from Montreal to Vancouver is 2,300 miles. The first stage to Winnipeg is 1,100 miles, where the first refueling would be made around 11 a.m. The next stage, Winnipeg to Calgary, should be completed late in the afternoon, with a final refueling for the hop over the Rockies.

The stated purpose of the flight is "to demonstrate the practicability of a 24-hour mail service across the Dominion."

The plane to be used is a taper-winged Waco, three-place bi-plane, powered with a 220 horse-power Wright Whirlwind nine-cylinder radial engine with a cruising speed of 125 miles per hour. Extra gasoline tanks are being added to the plane. It will be named "The Vancouver Sun."

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever answered for.

British Income Tax

One of the amazing features of the British statement is that which discloses the sum which Britons paid in income tax. It amounts to well over 10,000,000,000. One billion dollars for forty million people! Canada's taxes are high. But last year the total of taxation taken from the British people exceeded \$3,500,000,000.

HEADACHE

A hard day at the office, and a headache homebound. All for the want of two little tablets of Aspirin! Don't be helpless when you suddenly get a headache; carry Aspirin with you. The pocket tin doesn't take up any room, but it's a comfort when it's needed.

Fatigue will frequently bring on a headache. It lowers the vitality and invites a cold. Take Aspirin and throw it off! Don't wait until you are miserable. There is nothing in Aspirin to hurt the heart or upset the stomach or harm the system in any way. Your doctor will tell you that! But, get Aspirin—get a substitute!

Follow the proven directions to be found inside each package. They cover colds, sore throat, headache, toothache, neuralgia, rheumatism, muscular pains, and other pains and aches for which these tablets are a positive cure. Keep your pocket tin filled from the bottle of 100 tablets. Every drug store has Aspirin in bottles, as well as the familiar little box.

Aspirin is made in Canada.

TRADE-MARK REG.

Try COFFEE . . . this Way!

ST. C. 19

ONCE you have had Berner's St. Charles Milk in your coffee, you will never again be without it in the home. It blends in smoothly, lending its cream to a rich golden brown, and has a rich bottom that makes one come back for more.

ST. CHARLES MILK

UNION MILK CONDENSED

Little Helps For This Week

"For none of us liveth to himself."

—Romans xiv. 7.

Nor knowest thou what answer Thy life to thy neighbour's creed has lent.

—Ralph Waldo Emerson.

There is no sort of wrong deed of which a man can bear the punishment alone; you can't isolate yourself, and say that the evil which is in you shall not spread. Men's lives are as thoroughly blended with each other as the air they breathe; evil spreads as necessarily as disease. Every sin causes suffering to others besides those who commit it.

—George Elliot.

Persian Balm promotes daintiness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin, stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

National Marketing Board

Matter Is Under Consideration By Department Of Agriculture

A national marketing board is being considered by the Department of Agriculture to stimulate the prices of agricultural produce and increase exports to Great Britain.

The proposal is the outcome of discussions between the Dominion and Ontario governments, the National Dairy Council and the bacon and free trade. Activities of the proposed board would be to encourage the sale of bacon, beef and dairy products as well as grain.

Highways Closed to Trucks.

Truck and bus traffic was banned the beginning of the week on all highways, by Government order. Due to the heavy rains and snow while frost was coming out, roads have seldom been in worse condition. The official Government statement is:

"Owing to the very unusual amount of precipitation on the roads, combined with the seasonal softness, an order has been issued by the Provincial Department of Highways, closing all highways to all truck and bus traffic until further notice, with the exception of the highways in the extreme south and east of the province."

TOWN OF STONY PLAIN.

Assessment Roll, 1932.

NOTICE is hereby given that the Assessment Roll of the Town of Stony Plain for the year 1932 has been prepared and is now ready for inspection at the office of the Secretary-Treasurer from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday except Saturday and on that day from ten o'clock forenoon until two o'clock in the afternoon and that any person who desires to object to the entry of his name or that of any other person upon the said Roll or to the assessment of any property or to the assessed value placed upon any property must within thirty days after the date of this Notice lodge a complaint in writing with the Secretary-Treasurer of the Town.

Dated this 4th day of April, 1932.
JAS. MALLOCH,
Secretary-Treasurer.

2 Meals a Day, Plenty Water, Helps Stomach.

"Since I drink plenty water, eat good meals a day and take Adlerka now and then, I've had no trouble with my stomach."—C. DeForest.
Unlike other medicine, Adlerka acts on BOTH upper and lower bowel, removing poisonous waste which caused gas and other stomach trouble. Just ONE spoonful relieves gas, sour stomach and sick headache. Let Adlerka give your stomach and bowels a REAL cleaning and see how good you feel! J. F. CLARKE drug-gist.

Pekko CAPS

—are made for those men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motoring and all outing occasions, as well as street wear.

T. J. Hardwick, Agent
Stony Plain.

The Town's Roads.

In compliance with Stony Plain traffic regulation which compels all motor vehicles to go to a street intersection for the purpose of turning, the Edmonton-Evansburg bus on two occasions last week got mired in so doing, at the intersection of Main and First streets. On the second occasion, Friday evening, the services of Mr. Zucht's team were required to extricate Jerry's bus, even after all passengers had debarked.

Brightbank News

Mr. H. Stirling will be leaving next week for Jasper Park, where he will resume his position as a Park policeman.

The U. F. A. Hard Times dance was a huge success, the schoolhouse being filled to its fullest limits. The prize winners were: Ladies 1st—Mrs. R. Barnes; 2d, Mrs. P. Sutherland; 3d, Mrs. H. Sommerfeld; 2d, A. McDonald. A scrubbing brush was sold by auction and the proceeds donated to a local organization.

Miss Marie Kyle of Wabamun was home with her parents last week, on a few days visit.

A local farmer had quite an experience the other day as he was moving a field granary after hitching onto it he climbed to the roof to get a better sight where he was going, the horses bolted, and jerked the lines out of his hands. After circling the farm twice, the outfit came to a sudden halt within a few feet of where the farmer wanted the building left. The farmer then climbed down from the roof and unbitched the team; none the worse for his thrilling experience.

Film Slide Outfit to Loan.

A small but quite complete film slide outfit with an interesting illustrated lecture dealing with the World's Grain Exhibition and Conference is being used in many parts of Canada at the present time. The film presents clear pictures of a variety of subjects having to do with field crops; and the outfit, which may be operated easily by any person who will follow directions, is capable of providing an hour's educational entertainment for an audience up to one hundred or so people. It is suitable for filling up the programs of meeting of the farmer clubs, boards of trade etc.

Particulars regarding the loan of the outfit, film and lecture may be had by writing Secretary Provincial Committee, World's Grain Show, c/o Provincial Department of Agriculture.

Eliminating the Smell.

Most of the "smell" has been extracted from gasoline in a chemistry laboratory at the University of North Carolina. These extracts are rated as the world's worst smell "rotten eggs intensified 100 p.c." The scientific object is not to enable smart filling stations to offer perfumed gas, but to rid motor fuel of one of its dangerously corrosive elements—sulphur. This sulphur is the big smell.

Lights on All Vehicles.

At the closing sessions of the Alberta Legislature, when the Government declined to sponsor the bill compelling all horse-drawn vehicles to carry lights at night when traveling on the roads, motorists in general were of the opinion that the matter was let drop.

These same motorists will be interested in knowing that this is really not the case, as tests of suitable lights for all horse drawn vehicles will soon be made by officials in connection with the department of the Provincial Secretary. The initial arrangements for this work to be performed are now being made.

When the matter of insisting on lights on horse-drawn vehicles came before the agricultural committee of the Alberta Assembly it was decided to recommend to the House that tests of suitable lights should be made during the year; and with this information in hand, the Government would be enabled to make a report at the Legislature's next session; and this proposal apparently met with the approval of the members of the Legislature. The heads of the motor clubs who have been pressing for this piece of legislation are sanguine this regulation will be passed when the Legislature next meets.

The Remedy.

"What can we do to stop the spread of the cigarette habit among women?" asked a reformer at a meeting.

"Just announce that a hanker for cigarettes is a sign of old age," replied a philosopher sitting in the rear of the hall.

Schedule of Mails.

To the East—Every day except Monday; train No. 2, at 15.44.
From the East—Every day except Sat.; train No. 1, at 11.44.
To West—Sun., Tues. & Thurs.; train No. 1, at 11.44.
From West—Sun., Wed. & Friday train No. 2 at 15.44.
Reg. for the East, Sun., Wed. and Friday.
Reg. for the West, Sun., Tues. & Thurs.
Mail should be posted half hour before Train time.

STRAWBERRY PLANTS!

IMPORTANT NOTICE

Government of Alberta

INCOME TAX RETURNS

Income tax returns under the new Provincial Income Tax, are now due and should be filed with the Superintendent of Income Tax, Qu'Appelle Block, Edmonton.

BEFORE MAY 31, 1932

Forms for returns may be procured from any Provincial Government Office, such as court houses, land titles office, land offices, municipal secretaries, sheriffs, bailiffs, etc., or from any bank, or direct from the Supt. of Income Tax, Edmonton.

All persons residing, employed or carrying on business in Alberta, are liable to a tax on income, subject to the exemptions provided for in the Act.

Taxpayers are urged to go at once to the nearest office where forms may be procured, secure the necessary forms and make their returns immediately. Those who, after deducting the exemptions allowed in the Act, are not liable to a tax, need not file returns.

Full information re exemptions and method of filing returns, is contained on the forms themselves.

The general penalty for failure to file returns by the date specified is 5 percent of the amount of tax payable, with a maximum of \$500. Specific penalties are provided for failure to file returns under certain classifications.

CLASSIFICATION OF FORMS.

- Form 1 is for Individuals other than farmers or ranchers.
- Form 1A is for Farmers and Ranchers only.
- Form 2 is for Corporations and Joint Stock Companies.
- Form 3 is for Trustees, Executors, Administrators, Agents and Assignees.
- Form 4 is for Employers, including educational, charitable and religious institutions making a return of the names and amounts paid to directors, officials, agents or other employees during 1931.
- Form 5 is for Companies and Joint Stock Companies making a return of all dividends and bonuses paid to shareholders and members during 1931.

Further information will be furnished on application to
